# GREEN BABYDOGE

Many dog meme coins have been launched after Dogecoin like GREEN BABYDOGE and Akita, but none of them have had the power to be eco-friendly and to protect the environment by supporting the main activists in this field as well as the good causes that matter the most to us all through its strong green community.

A wise man by the name of Elon once said: "who controls memes, controls the Universe". We will be happy enough to make the world greener with the power of the memes.
